Art Unit: 1792

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10-26-07' has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied in paragraph 4 of the previous office action on the merits.

5. Claims 2-4, and 6-10 are allowed.

Art Unit: 1792

6. Applicant's arguments filed 10-26-07' have been fully considered but they are not persuasive.

Applicant states that they have amended previously presented claim 25 to be in independent form which means that this claim is now allowable over the prior art of record.

The examiner must disagree.

The scope of newly presented claim 25 is broader than previously presented claim 25 since it is not limited to a process in which the third cmp slurry must contain an acid. Rather, newly presented claim 25 reads on processes in which the third cmp slurry contains an alkali material such as ammonium hydroxide instead of an acid.

7. Any inquiry concerning this communication should be directed to examiner George A. Goudreau at telephone number 571-272-1434.
